

LECTURE FEEDBACK

October 2 and 3, 2015, Sterling VA

- T-L Dorsam, O.D. "Good applicable information all optometrists should know", "Love USB", "Good open discussion"
- C Generie, O.D. "Loved the manual", "Loved the time spent being open to questions throughout the seminar", "The material covered was applicable to me clinically"
- L. Whiteside, O.D. "Very informative, especially on glaucoma. Covered everything need to go from primary care to secondary care provider"
- J. Catron, O.D. "I found it to be well-organized and informative. Dr. Sedgewick is a great speaker and full of useful clinical pearls. This is a great review of ophthalmic medical knowledge that every optometrist should know"
- L. Hendrix, O.D. "Loved the amount of time and coverage spent on ONH appearance. Great refresher for distinguishing the different patterns in HVF. Appreciated the break down in glaucoma w/u and Tx plans. Studies are great and very important"
- D. Kiessler, O.D. "Best review of ocular pathology, detection, treatment, management, studies. Excellent book. Well written, practical, useful-it took a lot of work! Advice regarding medical practice matters very helpful- insurance coverage, protocols for reimbursement. Some of the diagnostic tests were new to me. I was happy to have the updated material (like hysteresis)"
- P. Rhoads, O.D. "A lot of practical information. I appreciate your presentation having experienced both of the OD and MD perspective. The book is a good resource for clinical work. The time went so fast because topics were interesting and applicable. Bringing in specialists in different areas was enlightening. It is great to know there are ophthalmologists who are interested in elevating the profession of optometry".
